📍 Lagos, Nigeria

SUMMARY

Full stack developer with 4 years of industry experience, proficient in front-end, back-end and mobile development technologies. Demonstrated track record of leading successful project developments and collaborating effectively with teams to deliver innovative business solutions.

EXPERIENCE

Backend Developer

08/2021 - Present

Equity Group Holdings ↗

- Led USSD Loan Products development that caters to 16 million customers, ensuring critical service maintenance.
- Mastered overall application integration, providing immediate USSD team support and guiding logic implementation.
- Migrated service from Django to FastAPI, enhancing speed and user-friendly documentation.
- Oversaw end-to-end lifecycle of USSD services, ensuring successful implementation in multiple environments, including international rollouts to 6 countries.
- Managed Azure pipeline deployment and Dockerized a service layer for streamlined development.
- Leveraged Redis Database and Kubernetes for performance enhancement and operational efficiency.
- USSD framework development in Python and Rust

Full Stack Developer

01/2023 - 02/2024

Nirvana Labs ↗

- Spearheaded Rust based NFT Indexer creation, optimizing performance.
- Streamlined NFT Indexer to exclusively index ERC721 and ERC1155 tokens.
- Enhanced precision and relevance in the application's indexing capabilities.
- Architected PostgreSQL schema for seamless integration and data integrity.
- Developed cloud applications in Oracle, ensuring scalability and security.
- Led frontend development in enhancing user metrics interface and API integration.
- Worked on Telegram bot for customer relations

Backend Developer

04/2021 - 09/2021

Upwork ↗

- Conducted in-depth stock and market research, leveraging relevant APIs for data-driven decisions.
- Implemented advanced Correlation Coefficient formulas in Django, contributing to robust data analysis.
- Developed a seamless Django Rest Framework API for the React frontend application, ensuring effective communication.

Data Science Intern

09/2020 - 12/2020

Univelcity ↗

- Utilized Open Weather API for Lagos weather information retrieval, showcasing API integration skills.
- Developed a prototype Bank app in Python, demonstrating practical programming proficiency.
- Created a versatile Journal app entirely with Python, highlighting coding capabilities.
- Applied data cleaning and wrangling techniques for insightful data analysis.
- Gained hands-on experience with Tensorflow, practicing object detection and time series analysis.
- Achieved commendable 32nd position in the AWS DeepRacer competition, showcasing competitive spirit.
- Implemented volume adjustment with hand gestures using Mediapipe, demonstrating innovative technology application.

- Deployed a machine learning model with Flask, showcasing practical deployment skills in a real-world scenario.

PROJECTS

Software Developer

11/2023 - Present

GarchGo ↗

- CLI application for generating Golang boilerplate code.
- Selecting different architectures
- generating different projects

Software Developer

08/2023 - Present

Ussd framework ↗

- Unstructured Supplementary Service Data built in Python
- upgraded for Equity bank use case
- Refactored framework in Rust

SKILLS

Machine Learning	Intermediate	React Native	Intermediate
API Developemnt	Expert	Kubernetes	Basic
Mobile Development	Intermediate	Docker	Advanced
Frontend Development	Advanced	Typescript	Intermediate
Backend Developement	Advanced	Node.js	Advanced
Tensorflow	Intermediate	Next.js	Advanced
AWS	Intermediate	React	Advanced
Azure	Intermediate	JavaScript	Advanced
Redis	Advanced	Rust	Advanced
MongoDB	Intermediate	Golang	Advanced
PostgreSQL	Intermediate	Python	Expert

EDUCATION

Computer Science

12/2014 - 12/2019

University of Benin - Bachelor's Degree

Developing QR code payment method for college transport services.

CERTIFICATES

Labs - Docker for the Absolute Beginner - Hands On ↗

05/2022 - Present

KodeKloud

Introduction to Docker

Build a Stock Market Web App with Python and Django ↗

07/2021 - Present

Udemy

Stock Market application development with Python.

Introduction to Cybersecurity ↗

Cisco

Cybersecurity introduction

05/2021 - Present

Data Scientist

Univelcity

Data Science, Data Analysis, Machine Learning and Model deployment with Flask.

03/2020 - Present
